

REVO Brings the Music Home with SuperConnect Hybrid Radio and Spotify

Press Release

Lanark, Scotland, October 1st 2013

REVO is proud to announce the imminent release of its SuperConnect multi-format table radio. As well as a host of features including DAB/DAB+, internet radio, DLNA wireless connectivity and Bluetooth® streaming - SuperConnect is the first digital radio product to offer out-of-the-box support for Spotify's recently announced 'Connect' feature.

SuperConnect is the ultimate expression of REVO's design and engineering philosophy, and the culmination of everything we have learnt in 10 years of award-winning product design and development. Functionalism meets craft and technology, a next-generation audio device that beats at the heart of your musical ecosystem, providing whatever soundtrack you need. Radio from around in the globe, access to your personal music collection or an almost limitless supply of songs from the world's leading music streaming service.

Feature Rich // SuperConnect is equipped to receive a wide range of digital radio standards including DAB, DAB+, FM with RDS and internet radio – providing access to over 16,000 stations from around the world. But the music doesn't stop there - SuperConnect's ability to communicate with external devices and services is unrivalled. DLNA and WLAN technology enables wireless audio playback from external computers and music servers, Bluetooth® with aptX® delivers CD quality streaming from smartphones, tablets etc., and Spotify Connect completes the proposition by unlocking over 20 million tracks from the Spotify archive.

Audio and Technology // SuperConnect has a hardware specification to match its impressive feature list. A large secret-until-lit graphical OLED display is paired with an intuitive joystick control, enabling quick and easy navigation around SuperConnect's many features.

Every aspect of SuperConnect's design and development has been geared towards its audio performance, from its all-wood cabinet through to the advanced audio electronics that lie at its heart. The result is an open sound with clarity, detail and deep rich bass - free from coloration and distortion and benefiting from an expansive sound field. This class-leading audio performance is delivered courtesy of a 15W Class-D amplifier and patented BMR (Balanced Mode Radiator) loudspeaker technology.

Design and Construction // Aesthetically, SuperConnect is a balanced blend of modernity and mid-century charm, with a touch of functionalism added for good measure. The outcome is a timeless design with a level of attention to detail that leaves a lasting impression.

A hand-crafted wooden cabinet has been selected for its superb acoustic properties, clad in furniture grade American walnut, no other material provides the deep foundations of great audio performance like wood. The use of high quality anodised T6 aluminium for the front facia and speaker grille, and pressing steel for the radio's backplate further inject a reassuring tactility and sense of honesty that cannot be achieved with lesser materials.

Spotify Connect Explained

Spotify Connect is a new home audio experience that provides effortless control and enjoyment of your music right across a range of devices, from your phone, to your tablet, to your Revo SuperConnect radio. SuperConnect owners with a Spotify Premium account can now enjoy instant access to over 20 million songs from the Spotify music archive, all at superior audio sampling rates.

How It Works // You've just walked through the door, listening to your favourite playlist on your phone. With Spotify Connect, simply hit play on your SuperConnect radio and the music instantly fires up, right where you left off – ensuring you never miss a beat. Now pick up your tablet to keep controlling the music from your sofa, or seamlessly switch the sound to another Spotify Connect enabled product in another room.

The Beat Goes On // With Spotify Connect you don't need to rely on unstable connections to stream music between your devices. You can make calls, play a game, or watch a video - you can even take your phone or tablet out of range and the music will just keep playing.

To use Spotify Connect, Revo SuperConnect owners are required to download the Spotify app for their smartphone or tablet, and have an active Spotify Premium account. A free 30-day trial is available, for more details visit www.spotify.com/uk/freetrial/

“Access to the Spotify service has been at the top of our R&D wish list for almost four years, we're therefore excited to be able to deliver this fantastically compelling feature on our new SuperConnect radio.” said David Baxter, CEO of REVO.

“Spotify Connect gives you effortless control of your music across your phone, tablet and now Revo's SuperConnect radio, with millions of songs built right in.” said Sten Garmark , VP product management at Spotify. *“Connect ensures your music enjoyment is simple, seamless and hassle free.”*

SuperConnect has an SRP of £249.95 and can be purchased from the 5th of November 2013 from REVO stockists including John Lewis, Selfridges, The Conran Shop and Amazon.co.uk

SuperConnect can be pre-ordered from today by visiting www.revo.co.uk
