UNDOK

MULTIROOM AND APP CONTROL

REVO.

This innovative and easy-to-use application not only acts as a full remote control for a single Revo audio product, but is also the control hub for your entire multiroom system if you're using more than one UNDOK-enabled device.

Firstly, download the 'UNDOK' app from the Apple App Store (iOS devices) or the Google Play Store (Android Devices).

Ensure that your phone or tablet is connected to the same wireless network as your Revo device. Load the UNDOK app and your UNDOK-enabled devices should appear in the 'Audio Systems' opening screen. Using the app you can control an individual device or create groups of devices to provide a multiroom system.

Controlling your device

1
Launch the UNDOK app

2
All UNDOK compatible devices on your network will be listed in the 'Audio Systems' screen (right)

3
Select the device you wish to control to enter the main control screen (below)

Keep Radio Connected

To control your radio in non-internet modes (DAB, FM) you need to select 'Keep Network Connected' on the radio's 'Network Settings' menu. This also allows you to wake the radio from standby using the remote app.

MULTIROOM AND APP CONTROL

REVO.

CREATE A MULTIROOM ENVIRONMENT

If you are using more than one UNDOK device, it is possible to create a seamless multiroom environment.

Now select any devices that you wish to become 'slaves' within the group.

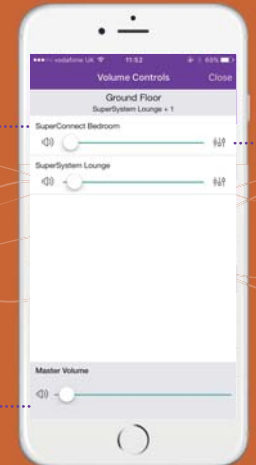

The 'Audio Systems' screen now shows your created multiroom group. Select the new group to control it.

The 'Now Playing' screen will now appear. You can select 'Source' or 'Browse' to have further control.

HANDY TIP

The 'Settings Menu' will allow you to change the display name of your device, set a sleep timer and set your time source.

To begin, simply select the pencil icon for the device you wish to become the 'master' of the group from within the Audio Systems screen.
